RE: Soccer Field Proposal Approval

Mr. Rasmussen: *Jeff*

This is to inform you that The Rio Rancho Public Schools has reviewed your proposal for the installation of possibly three (3) new fields at the high school campus. It is our understanding the district would not be requested to match or plan any district funds for this project. The basic concept is approved however the district reserves the right to approve any and all actual plans for installation including materials and process of installation. The district appreciates all the hard work that will be involved in this undertaking. Prior to installation of grass fields however, the district would like to have some feedback on two items. The first item, can the soccer club consider the installation of a synthetic type field to help with the reduction of water use and what about the existing field (stadium) is problematic both in the type of field it is and accessibility? Please provide this department with your information and good luck in the club's efforts to provide facilities for our student athletes. As discussed with you, I have shared your proposal with Dr. Cleveland, Superintendent, Dr. James E. King, Associate Superintendent of Administration, and the district's athletic director, and with these few requests the district approves the club's endeavors to raise funds for the project. Please feel free to contact me if you have any questions.

Sincerely,

Alfred R. Sena
Executive Director
Facilities Department
